EGN 1935

Introduction to Electrical and Computer Engineering

Instructor: Pramod P. Khargonekar
Dean, College of Engineering
Eckis Professor of Electrical and Computer Engineering

Time and place: Thursday 7th and 8th period, 1:55 – 3:50 PM, NEB 202

Prerequisites: None

Course Description: This course is aimed at freshmen and sophomore students who may be interested in pursuing electrical and computer engineering majors. Students will learn about the fields of electrical and computer engineering. Significant emphasis will be placed on future directions in these fields. Students will also learn about the variety of career paths they can pursue after getting a BS degree. We will cover issues of professional ethics in the context of engineering. The course will be accessible to students with no prior background in these fields or even engineering. We will have guest speakers from the ECE Department, industry and alumni. Course grade will be based on attendance and course assignments.
